### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

A) in claim 1, line 8, change "aprat" into --- apart ---.

2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, in combination with all the limitations, a rotor base with a central hole and one key formed on an interior surface of the central hole and a drive shaft inserted into the central hole and the shaft is movable between a first and second position, in which the first position the drive shaft is located in an upwardly most position and in the second position, the drive shaft is located in a downwardly most position and the drive shaft having a spiral groove located on an outer surface and extending upwardly from a bottom and the key being slidably inserted into each of the spiral groove and a biasing member located between the base and the drive shaft and providing a restitution force pressing the drive shaft away from the base and the rotor rotating in a first direction when the shaft moves

from the first position towards the second position and the rotor is rotated in a second direction opposite the first direction when the shaft moves from the second position towards the first position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
